

ESCA UK

The most versatile access equipment available

"We've now been using the ESCA for 2 years. We originally started off with one and now have 16 in use across the region. The key benefit is its total mobility so it can be used for all sorts of jobs on our sites and on uneven surfaces outside. Throughout, ESCA has supplied us with fantastic training and ongoing support so that our health and safety standards are maintained."

Nicola Wakeling
Training & Support Manager
Northumberland County Council

ESCA 3000

The Safest and most Versatile Mobile Access Platform you can buy

Allowing working heights of up to 7 metres, the ESCA 3000 makes it safe and easy to reach difficult areas. Manufactured in high quality, lightweight aluminium.

Compliant to European safety standards and the new HSE Working at Heights Regulations (April 2005), ESCA 3000 is indispensable for technical professionals.

ESCA platforms are used extensively across the world by organizations as diverse as facilities management and commercial storage companies, maintenance companies, airlines, shopping centres, hotels, theatres and schools.

The safest access equipment of its kind – ISO9002 accredited and built to European safety standards EN131 and HD1004 and verification certificate 05/281E1, BGVD36, and GPSSG safety standards for tools, equipment and products. Compliant with new 'Working at Heights' Regulations.

One man operation – A cost-effective and time saving solution to reach difficult-to-access areas.

Mobility – Yes, it can be 'driven' and maneuvered by the operator (see overleaf)! No need to climb up and down to reposition.

Flexibility – Can be used almost anywhere indoors and out and used on uneven and soft surfaces.

Compact – Arrives in a lightweight flat pack and small enough to be carried in a small van or estate car (see overleaf)!

Low running cost – There are no electrical or hydraulic parts to go wrong or require a service.

Versatility – Can be adjusted for different heights and weights, from four to eight metres and up to 250kg platform capacity.

Free standing – does not damage decor.

...All this at a fraction of the cost of a good quality scaffolding system!

ESCA 3000 folded

“ We have found the ESCA to be pretty much indispensable for our building. The design appears both safe and adaptable, and enables our staff to work at height with confidence, whether it is hanging valuable artwork or changing a light bulb. The ability to safely move the ladder whilst at the top is ingenious and efficient. ”

James Knight,
Managing Director,
Bonhams Auctioneers,
London.

Working Height (m)	Platform Height (m)	Weight (kg)	Supporting Space (m)		Permitted Operator Weight (kg)
			Front Wheels	Rear Wheels	
4	2.04	55	1	1.05	160
5.5	3.54	78	1	1.35	160
7	5.04	108	1	2.15	160
